

Umang Ahirwar

Java Developer

Kutch, Gujarat | +91-9909524699 | LinkedIn | GitHub | Portfolio Website

Summary

Computer Science graduate with a strong interest in backend development and a solid foundation in Java and Spring Boot. Confident in building RESTful APIs and full-stack applications through hands-on project work. Known for being detail-oriented and consistent in learning new technologies, with a focus on writing clean and reliable code. Seeking an entry-level Java Backend Developer role to contribute, grow, and take on real-world development challenges.

Technical Skills

Languages: Java, JavaScript, SQL

Backend Technologies: Spring Boot, Spring Framework, Spring Data JPA, Hibernate, Spring Security, RESTful APIs, Node.js, Express.js

Frontend Technologies: React, HTML5, CSS3, JavaScript (ES6+)

Databases: MySQL, MongoDB

Tools: Git, Maven, Postman

Concepts: Object-Oriented Programming (OOP), Data Structures, Exception Handling, MVC Architecture, API Integration

Methodologies: Agile Development, Clean Code Practices

Experience

Full Stack Developer, Exposys Data Labs, Bengaluru

March 2025 – June 2025

- Assisted in developing RESTful APIs using Spring Boot, applying core Java and OOP principles to understand how backend services are structured.
- Worked with Spring Data JPA to integrate databases and implement CRUD operations, gaining practical experience in storing and retrieving application data.
- Learned and implemented basic exception handling in APIs to return meaningful error responses and improve application reliability.
- Contributed to backend development tasks and bug fixes while gaining practical experience with the development workflow in an agile environment.

Full Stack Developer, BytesBizz Technology LLP, Rajkot

Jan 2024 – Apr 2024

- Built user interfaces using React with functional components and JSX, while implementing basic state management with hooks such as useState and useEffect.
- Developed REST API endpoints using Node.js and Express.js to handle HTTP requests and responses in backend development.
- Contributed to frontend and backend development tasks during project implementation while gaining experience in how application features are built and integrated.
- Gained practical understanding of data flow between the client (React) and server (Node.js APIs) in a full-stack web application.

Projects

Ecommerce Web Application

A full-stack e-commerce web application built using Spring Boot and React that allows users to browse, search, and manage products through RESTful APIs.

- Built a full-stack e-commerce web application that allows users to browse products, search items, and add or remove products from the cart.
- Developed RESTful APIs using Spring Boot to handle product management and cart operations.
- Used Spring Data JPA for database interaction and implemented CRUD operations to manage product data efficiently.
- Designed the React frontend using functional components to display products and integrate seamlessly with backend APIs.

Tech Stack: Java, Spring Boot, Spring JPA, React, SQL

User Management System

A RESTful API built with Spring Boot and React enabling complete user management through CRUD operations.

- Developed backend REST API using Spring Boot with full CRUD functionality for user management operations.
- Implemented Spring JPA for database persistence and query operations, ensuring efficient data handling.
- Created React frontend interface integrated with backend API for seamless user interaction.
- Applied exception handling and input validation to ensure data integrity and application reliability.

Tech Stack: Java, Spring Boot, Spring JPA, React, SQL

Movie Catalogue

A React-based web application allowing users to explore movies, check ratings, and manage a favorites list.

- Built responsive single-page application using React with component-based architecture and state management.
- Implemented features for browsing movies, viewing ratings, and adding/removing favorites with persistent data handling.
- Utilized React hooks (useState, useEffect) for efficient state management and side effects handling.

Tech Stack: React, JavaScript, HTML5, CSS3

Education

Bachelor of Engineering in Computer Engineering , Government Engineering College Rajkot	Sep 2021 – Feb 2025
• CGPA: 6.8 / 10	
Diploma in Computer Engineering , Tolani Foundation Gandhidham Polytechnic	Jun 2019 – Jul 2021
• CGPA: 7.0 / 10
