ABOUT ME

I am a passionate Full Stack Developer with a strong foundation in both frontend and backend development. I enjoy creating dynamic, responsive web applications, combining user-friendly interfaces built with React, HTML, CSS, EJS, and Bootstrap, with robust backend systems powered by Node.js, Express, MongoDB, and SQL. I take pride in writing clean code, building RESTful APIs, handling CRUD operations, and ensuring smooth functionality through effective error handling.

EDUCATION

- TOLANI FG POLYTECHNIC 2024 - 2027
DIPLOMA IN C.E.
CGPA : 7.0
- GEC RAJKOT 2021 - 2024
BACHELOR IN C.E.
CGPA: 7.0

SKILLS

- REACT
- NODE
- MYSQL
- JAVASCRIPT
- MONGO DB / MONGOOSE
- EXPRESS, REST, EJS
- HTML, CSS
- ERROR HANDLING

INTERNSHIPS:

2023 • EXPOSYS DATALABS BENGALURU (15 DAYS)

Worked on a real-time video calling project featuring integrated chat functionality and a simple, intuitive user interface. Utilized HTML, CSS, Bootstrap for responsive front-end design, and implemented the back-end using Node.js and MongoDB to manage user data and messaging.

Focused on building a seamless user experience by combining dynamic UI elements with efficient server-side logic, while gaining practical experience in full-stack web development and real-time communication technologies.

2024 • BYTESBIZZ TECHNOLOGY RAJKOT (4 MONTHS)

Completed a 4-month web development internship at Bytes Bizz Technology, where I gained practical experience in designing and developing responsive, user-friendly websites. Contributed to both front-end and back-end development, focusing on performance optimization, debugging, and delivering high-quality web solutions.

Collaborated closely with the development team on multiple full-stack projects, utilizing technologies such as React for building dynamic interfaces, Node.js for server-side development, SQL for efficient database management, and JavaScript for interactive functionality. Additionally, applied HTML, CSS, and Bootstrap to create visually appealing, responsive layouts tailored to project requirements.

PROJECTS:

WANDERLUST:

- Full-featured rental platform developed using Node.js, Express, and MongoDB
- Secure user authentication implemented with Passport.js including password hashing
- Database relationships properly established between users, listings, and reviews
- Complete CRUD functionality for property listings and user reviews
- Interactive review system with proper data associations
- RESTful API backend following best practices for data operations
- MVC architecture ensuring clean separation of concerns
- Responsive frontend built with Ejs and bootstrap

SPOTIFY:

- Spotify Interface Clone: Developed a responsive front-end replica of Spotify's web player using HTML5 and CSS3
- Interactive Elements: Implemented hover effects on buttons, cards, and play controls for enhanced user experience
- CSS Animations: Added smooth transitions for playback controls and loading states
- Visual Fidelity: Matched Spotify's color scheme, typography, and layout with pixel-perfect attention to detail
